

TOOLS REQUIRED

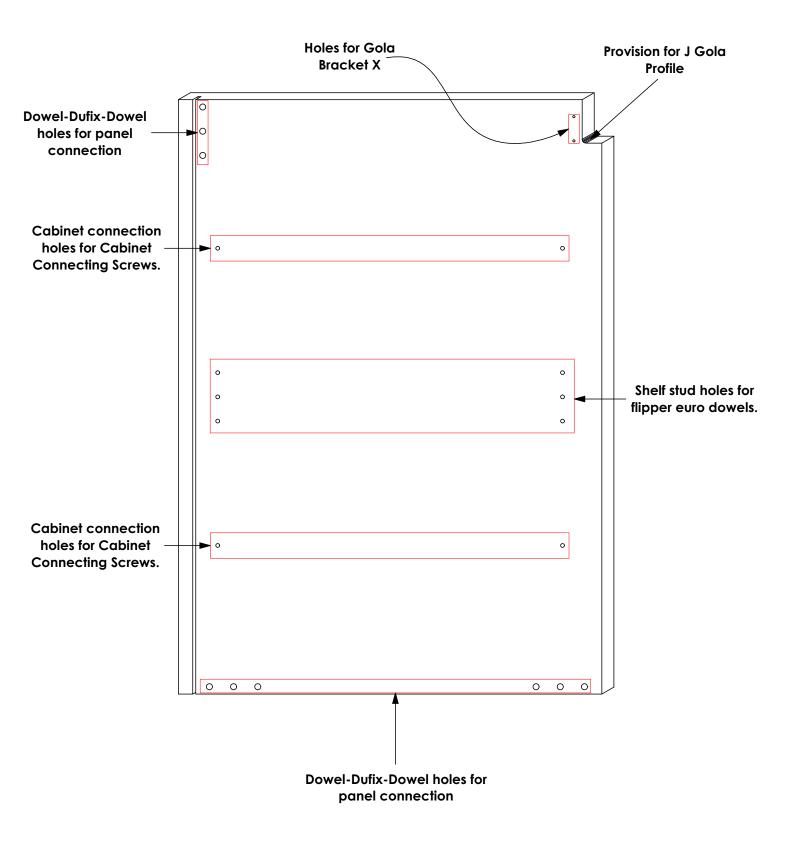

GENERAL INSTRUCTIONS

- 1. Confirm that all panels (10) are in the package before assembling.
- 2. Check the white sticker on each panel for the labelling (A, B, C, D, E, F, G, H, I & J).
- 3. Ensure that the panels are laid on a non-abrasive surface when assembling.
- 4. Note that all panel connections are done using the system described below.

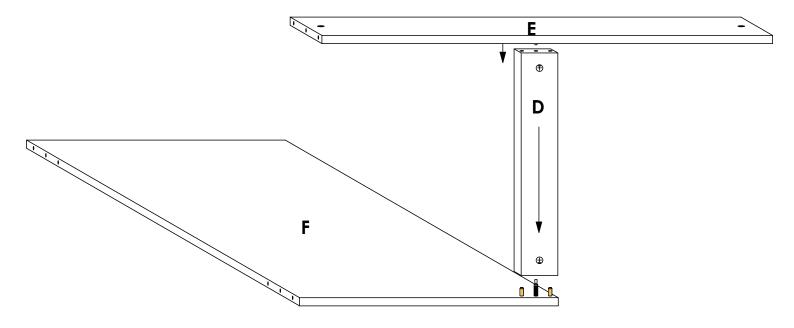

PG BISON

PILOT HOLES GUIDE FOR RIGHT SIDE PANEL

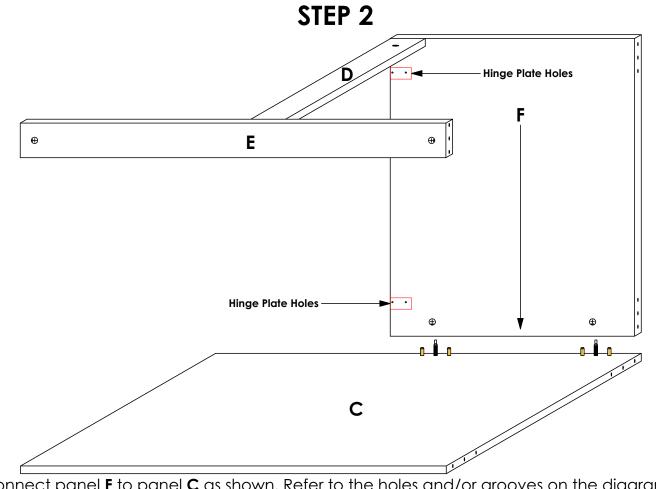

STEP 1

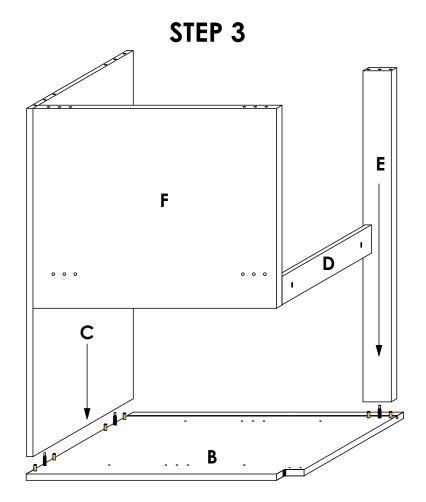

First, connect panel **D** to panel **F** as shown. After, connect panel **E** to panel **D**. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

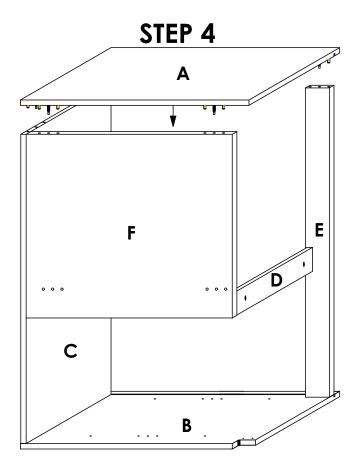

Connect panel **F** to panel **C** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

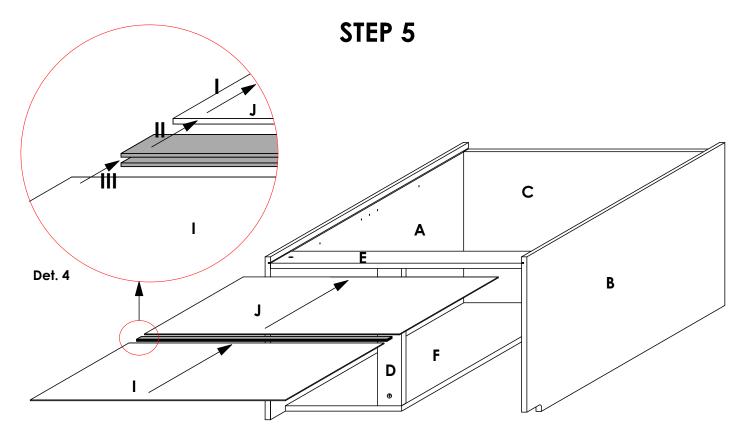

Connect panels **C & E** to panel **B** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

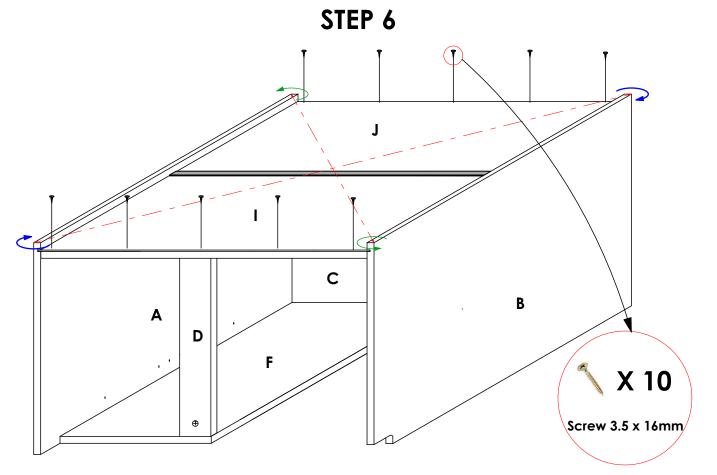

Connect panel **A** to panels **C**, **E & F** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

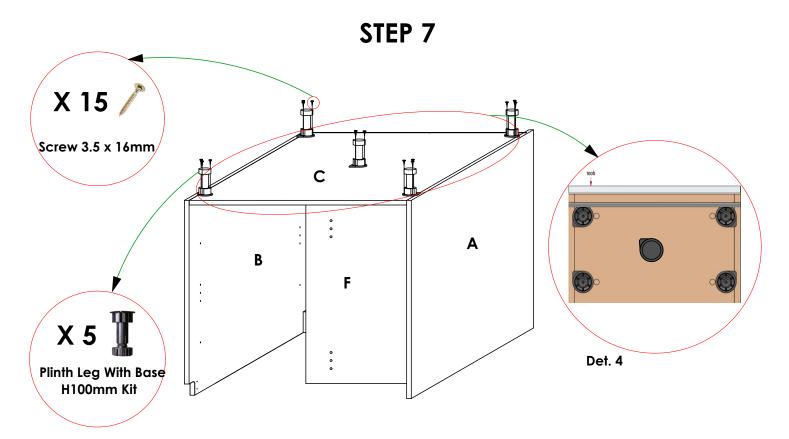

Slide 3mm panel J into the groove on panels A & B with the finished side facing inside the cabinet. Next, insert the H Profile Backer Connector into panel J as shown (See Det. 4). To finish this step, slide 3mm panel I through the groove on panels A & B and into the H Profile Backer Connector as shown in Det. 4.

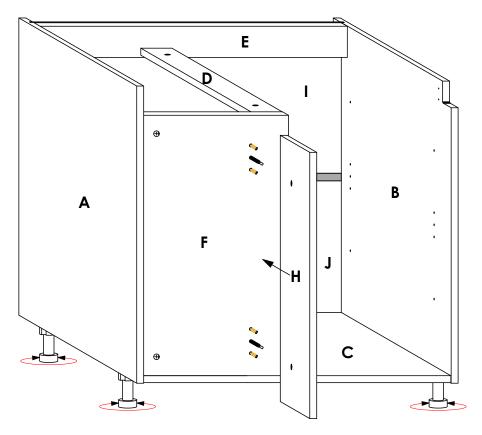

First, **check the diagonal** of the cabinet by measuring the two distances indicated by the broken lines. They should be equal. If not, twist the cabinet accordingly in the diagonal corners as shown until an equal value is achieved. After, secure panels I & J to panels E & C respectively as shown using Screw 3.5 X 16mm.

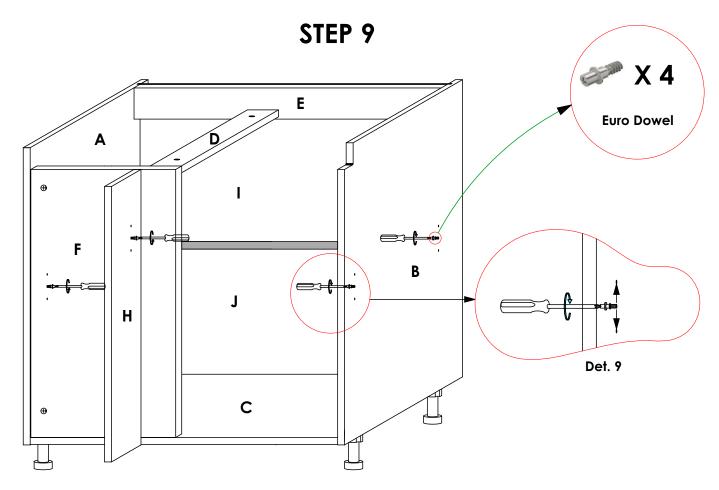

Flip the cabinet up-side down as shown. Place the five units of **Plinth Leg With Base** in the shown positions, aligning with the pre-drilled pilot holes on panel **C**. Ensure that the orientation is as shown in **Det. 4**. Using **Screw 3.5 X 16mm**, secure the legs onto panel **C**.

STEP 8

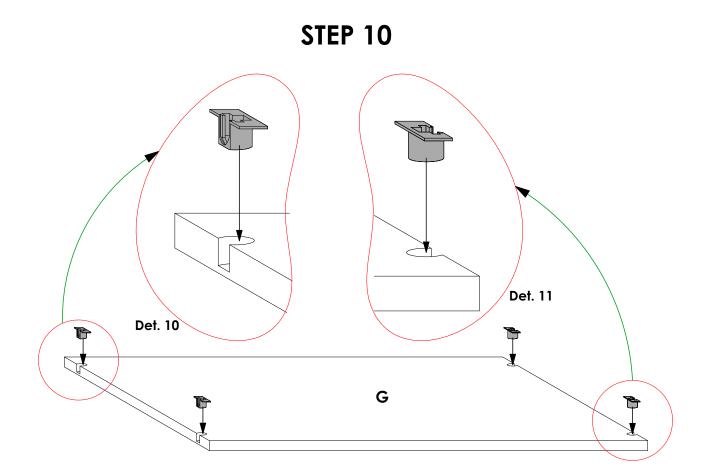

Connect panel **H** to panel **F** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation. After, place the cabinet in the desired position and adjust its height by rotating the base of the legs as shown to level.

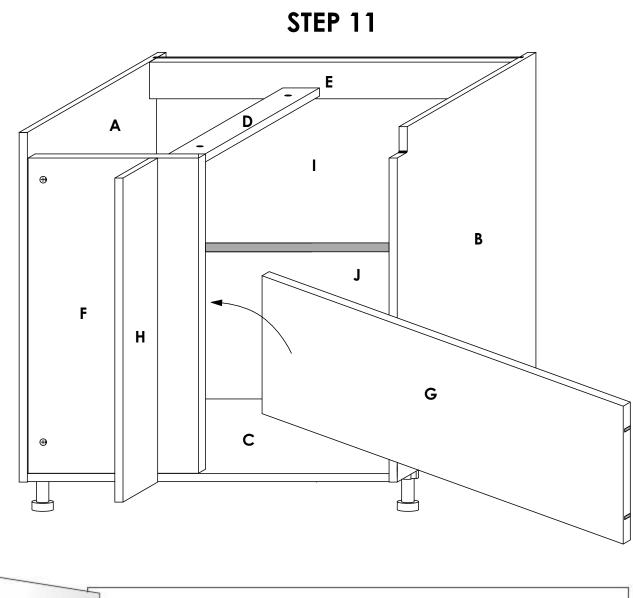

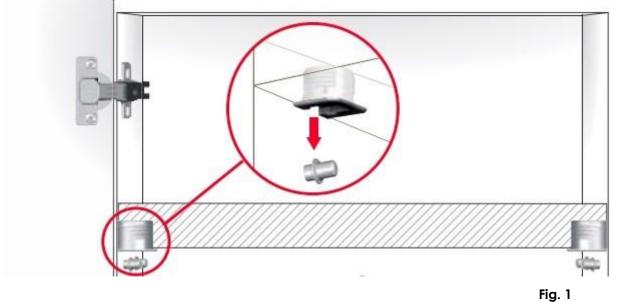

Screw in the **Euro Dowels** in the shown positions on panel **A** and panel **B**. Their positions can be adjusted as shown in **Det. 9** to change the level of the shelves or to slant the shelves.

Insert the **shelf supports** in the shown positions. Confirm that the orientation is as shown in **Det. 10** and **Det. 11**.

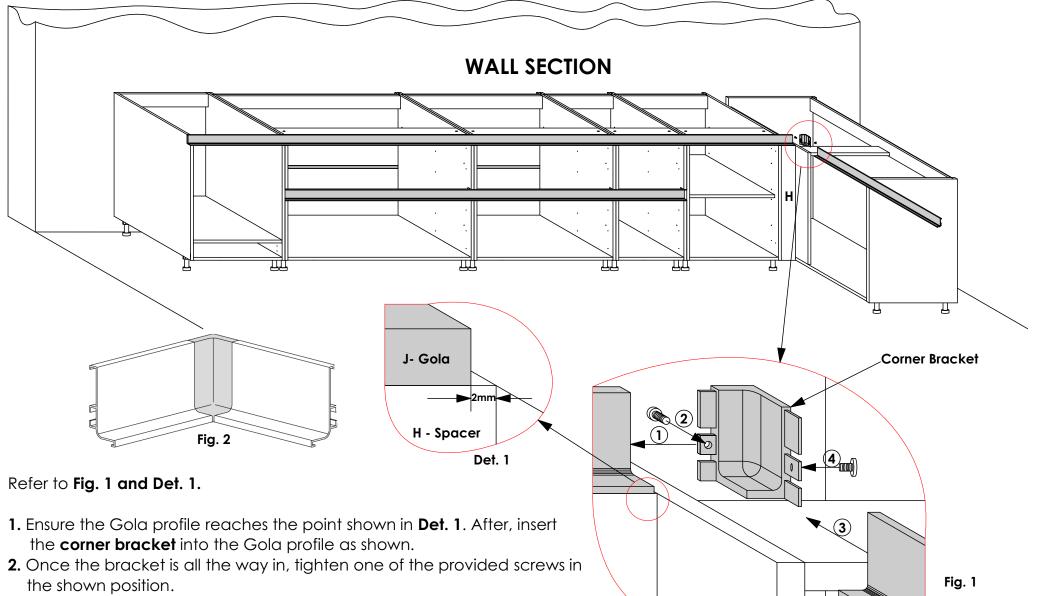

Slide in the shelf (Panel G) above the euro dowels as shown. Slide it in until it touches the back.
Press down the shelf lightly such that the euro dowels snap into the shelf supports. See Fig. 1.

See the Door Installation guide for further instructions.

GOLA INSTALLATION GUIDE GOLA INTERNAL CORNER

- **3**. Insert the Gola profile into the corner bracket as shown.
- **4.** Once the Gola profile is all the way in, tighten one of the provided screws in the shown position.
