FURNITURE FLATPAX - READY TO ASSEMBLE

PG Bison [Kenya] Ltd – Company Profile

Established in 2002, PG Bison [Kenya] Ltd has over two decades of expertise in manufacturing flat-pack furniture from wood-based panels. Operating from production facilities located in Nairobi and Mombasa, the company offers a diverse range of cabinetry for kitchens, bedrooms, living rooms, bathrooms, and home offices, as well as domestic furniture collections—including Bofa, Roka, and Gedi—featuring media units, coffee tables, bookshelves, night stands and chest of drawers. Designed for affordability and ease of assembly, PG Bison's furniture is accessible to all income levels. Customers can quickly access assembly instructions by scanning a QR code on the packaging.

Advanced Manufacturing & Quality Assurance

PG Bison's state-of-the-art production plant utilizes CNC machinery and Industry 4.0 automation for precision cutting, edging, drilling, and laminating. All hardware is sourced from certified global suppliers, ensuring durability and reliability.

Commitment to Sustainability

The company prioritizes eco-friendly practices, sourcing timber from sustainably managed plantations and recycled industrial waste. Through remanufacturing and recycling, PG Bison promotes a circular economy, minimizing environmental impact. It's a zero waste company. The entire plant runs on solar power.

Quality Certifications

- Diamond Mark of Quality (March 2023) for wood-based panels from South African partner plants.
- KEBS SM Mark for all furniture manufactured in Kenya.

MelaWood® is PG Bison's leading brand of melamine faced board, offering a range of globally inspired designs and finishes. It combines aesthetic appeal with functionality, providing a durable, 100% closed melamine-resin surface that offers superior protection.

Anti-Bacterial Protection - MelaWood® incorporates an anti-bacterial additive within its melamine resin, effectively eliminating bacteria that may settle on the surface within hours. This makes it ideal for hygiene-sensitive, high-traffic areas like healthcare facilities, offices, schools, restaurants, and retail spaces.

Durable and Easy to Maintain - The closed surface is resistant to scratches, moisture, and easy to clean with standard soap or alcohol-based disinfectants.

Long-lasting - The anti-bacterial properties are integral to the board, not just a surface coating, ensuring long-term effectiveness compared to porous materials like wood or stone.

How it's Made

MelaWood® is produced by bonding melamine-impregnated décor paper to both surfaces of a high-quality board using heat and pressure. This creates a robust, scratch-resistant surface. Exposed edges should be properly edged with suitable glue to prevent moisture damage.

Application

Ideal for medium duty vertical and light horizontal applications, such as freestanding and built-in cupboards, door and drawer frontals, carcasses and shelving, wall cladding and interior building elements, MelaWood® is perfect for kitchens, offices and shops.

MelaWood® is available in four fashionable surface finishes:

Fusion - natural, veneer look

Linear - strong textured, straight wood grain

Natural Touch - velvety matte finish

Peen - textured, stipple effect

MelaWood® is available in a variety of designs and finishes to meet diverse needs, ensuring both aesthetic appeal and superior performance in numerous applications.
