

EDGLINE QUICKLOC FLATPAX KITCHEN RANGE

ASSEMBLY GUIDE

WALL CABINET 450mm

HARDWARE

TOTAL NUMBER OF PANELS: 6

PRODUCT	QTY	IMAGE
Sys5 Quickfit TL2 Dowel 8 x 34	8	
Sys5 Cam 3000 15 x 14 mm	8	
Wooden Dowel Titus 8 x 30 mm	16	
Screw 3.5 x 16mm	10	
APC 1 Wall Cabinet Hanger Kit	1	
Screw Nail in Anchor 8 x 80mm Yellow	4	
Cabinet Connecting Screw Kit	4	
Shelf Support Flipper 14mm Kit	4	

TOOLS REQUIRED

Screw Driver
(Pozi Drive Head)

Cordless Drill

Pozi Bit (PZ2)

8mm Drill Bit

Rubber Mallet

GENERAL INSTRUCTIONS

1. Confirm that all panels (6) are in the package before assembling.
2. Check the white sticker on each panel for the labelling (A, B, C, D, E & F).
3. Ensure that the panels are laid on a non-abrasive surface when assembling.
4. Note that all panel connections are done using the system described below.

PANEL CONNECTION AND FASTENING

PILOT HOLES KEY FOR SIDE PANELS

STEP 1

Connect panels **C & D** to panel **A** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

STEP 2

Connect panel **B** to panels **C & D** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

STEP 3

Slide **3mm** panel **E** through the grooves on panels **A & B** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

STEP 4

First, **check the diagonal** of the cabinet by measuring the two distances indicated by the red, broken lines. They should be equal. If not, twist the cabinet accordingly in the diagonal corners as shown until an equal value is achieved. After, place the **APC 1** hangers in the shown positions ensuring that the shaded areas are flush with each other. Then, secure panel **E** to panel **C** using **Screw 3.5 X 16mm** and to panel **D**, through the **APC 1** hangers, using **Screw 4 X 30mm**. Reinforce the **APC 1** hangers in the shown positions using **Screw 3.5 X 16mm**.

STEP 5

The **broken lines** indicate the **outer boundaries** of the **wall cabinet**. Mark the drill points on the wall with respect to the hanging position of the wall cabinet. Refer to **Det. 5** for dimensions. Then, using an **8mm** Drill Bit, drill **80mm deep** holes through the marked positions on the wall ensuring that the **drill bit** is **perpendicular** to the **wall surface**.

STEP 6

- I) Separate the **yellow plug** from the **nail in anchor** and, using a **rubber mallet**, **gently** knock in the plug into the holes drilled in **Step 5**.
- II) Place the **APC 1 wall plates** on the wall. Align the oval holes on the wall plate with the plugs.
- III) Screw the **nail in anchor** into the **yellow plug**.

STEP 7

Hang the wall cabinet on the wall by hooking the **APC 1 Hangers** onto the **APC 1 wall plates**. See **Det. 7**. Also see **Det. 7** for **adjustment** details.

STEP 8

After mounting and levelling the cabinet, snap in the **APC 1 cover caps** to conceal the holes on panel **F**. See **Det. 8**

STEP 9

Screw in the **Euro Dowels** for flipper in the shown positions. Their positions can be adjusted as shown in **Det. 9** to change the level of the shelves or to slant the shelves.

STEP 10

Insert the **shelf supports** for flipper in the shown positions. Confirm that the orientation is as shown in **Det. 10** and **Det. 11**.

STEP 11

Fig. 1

1. Slide in the shelf (Panel **F**) above the euro dowels as shown. Slide it in until it touches the back.
2. Press down the shelf lightly such that the euro dowels snap into the shelf supports. See **Fig. 1**.

See the Door Installation guide for further instructions.
