INTEGRATO Z

INTEGRATO Z is a further development within the INTEGRATO family. It is conceived for heavy duty furniture whose construction has weight-bearing

The leveller is installed into the bottom panel by operating a Ø30 mm boring with a 16 mm depth, thus requiring a minimum 18 mm thickness.

A Ø8 mm through hole in the bottom panel allows the adjustment of the independent plastic glide by using a S6 mm allen wrench or both cross and blade screwdriver.

Just like all other INTEGRATO levellers, the capacity loading is 175 Kg each.
