

#### TOTAL NUMBER OF PANELS: 11

#### HARDWARE

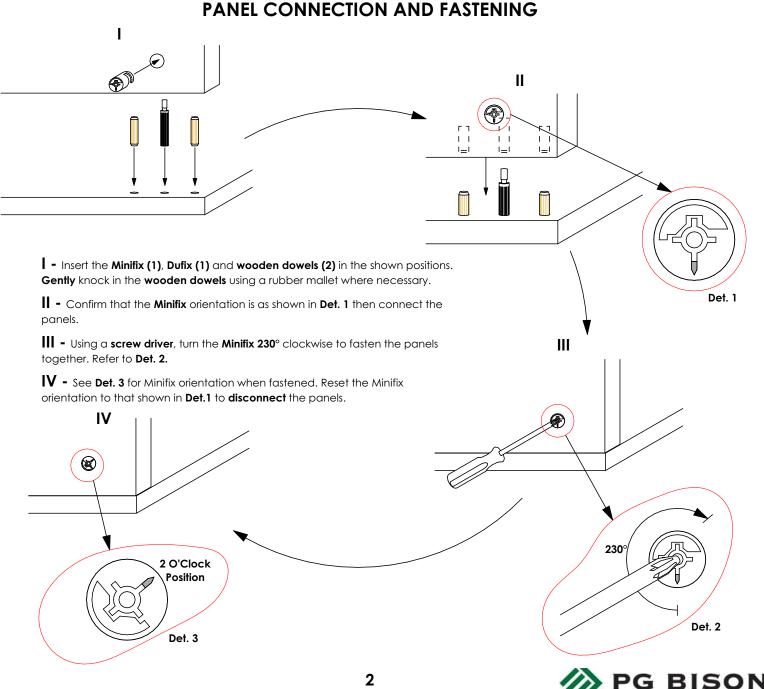

PRODUCT	QTY	IMAGE
Sys5 Quickfit TL2 Dowel 8 x 34mm	24	
Sys5 Cam 3000 15X14mm	24	Ð
Wooden Dowel Titus 8 x 30mm	48	A CONTRACTOR
Screw 3.5 x 16mm	32	X Jun
Plinth Leg With Base H100mm Kit	4	
Cabinet Connecting Screw Kit	8	

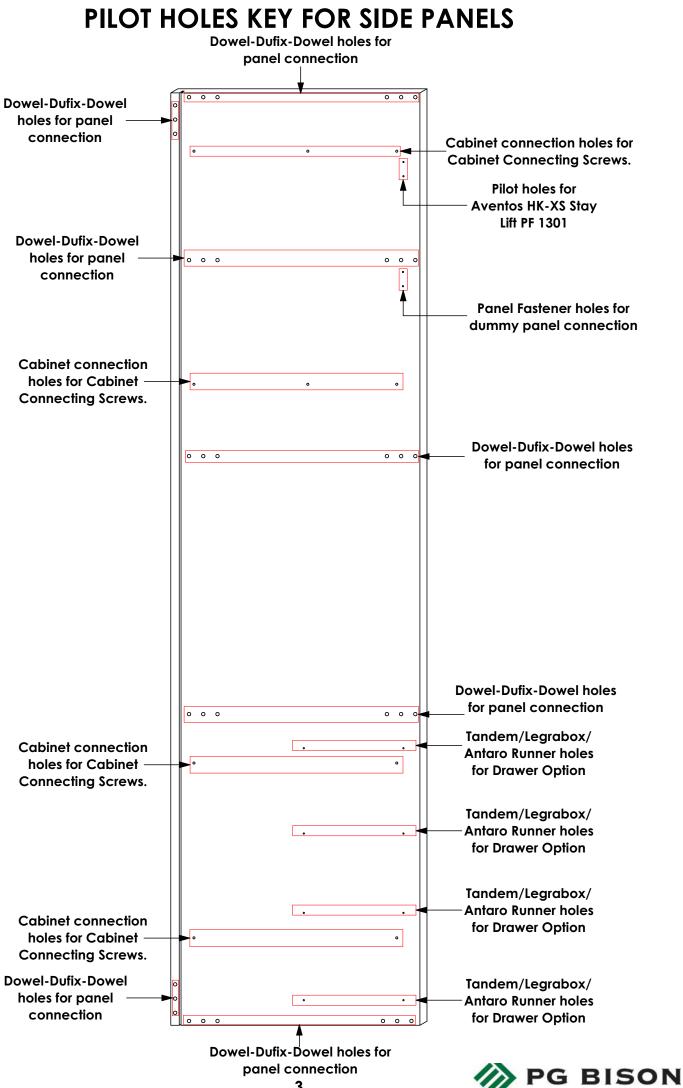

### **TOOLS REQUIRED**

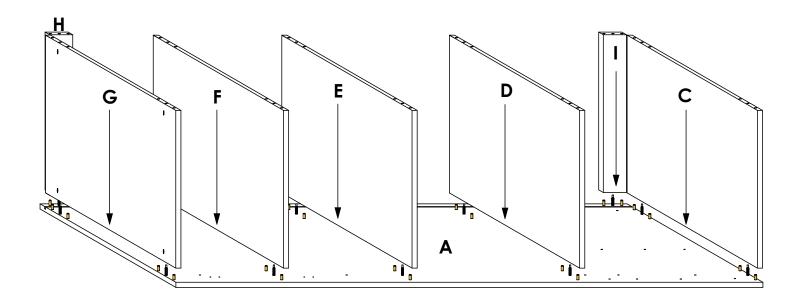

## **GENERAL INSTRUCTIONS**

- 1. Confirm that all panels (11) are in the package before assembling.
- 2. Check the white sticker on each panel for the labelling (A, B, C, D, E, F, G, H, I, K & L).
- 3. Ensure that the panels are laid on a non-abrasive surface when assembling.
- 4. Note that all panel connections are done using the system described below.

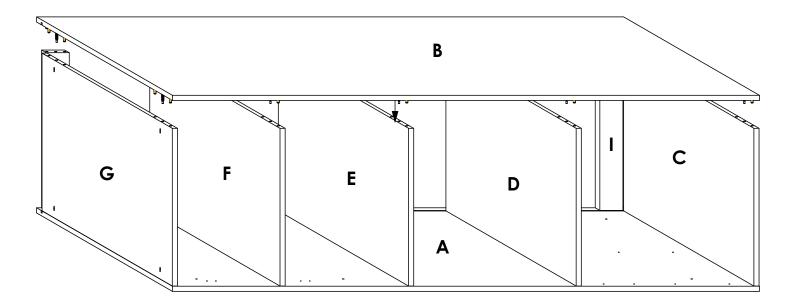

# **STEP 1**

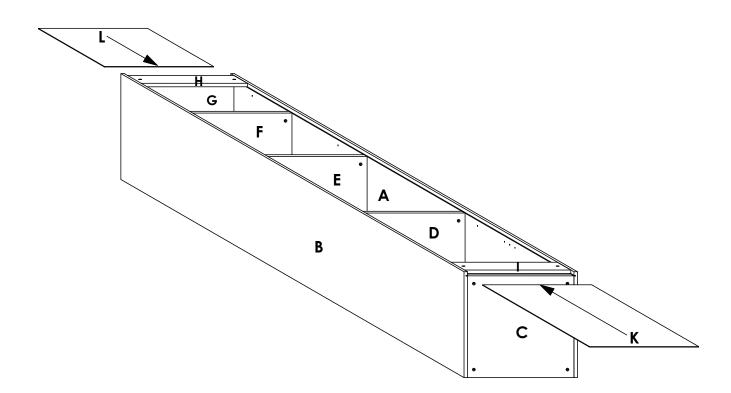

Connect panels **C,D, E, F, G, H & I** to panel **A** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

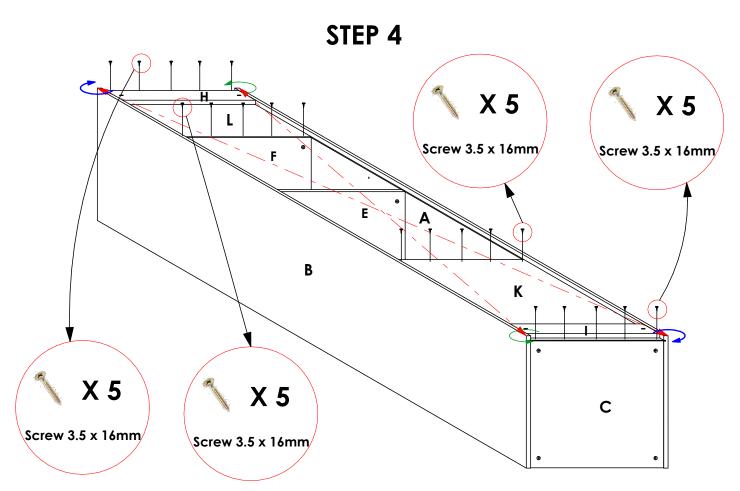

Connect panel **B** to panels **C**,**D**, **E**, **F**, **G**, **H & I** as shown. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

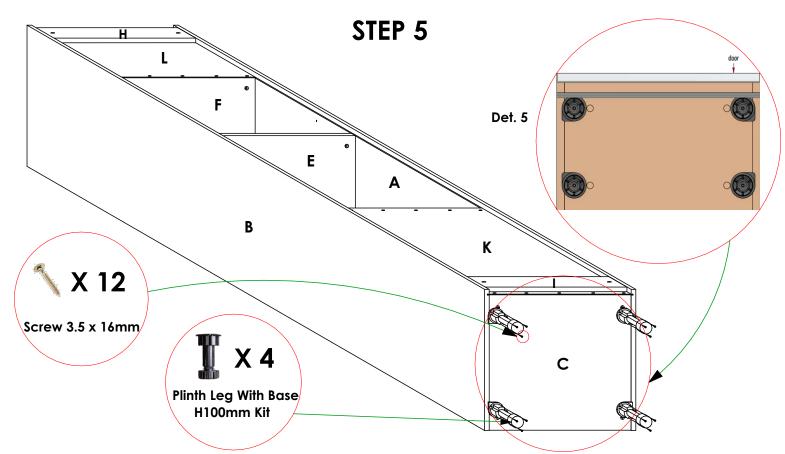

Slide the 3mm panels (**K & L**) into the grooves on panels **A & B** with the finished side facing down. Refer to the holes and/or grooves on the diagram to determine the panel orientation.

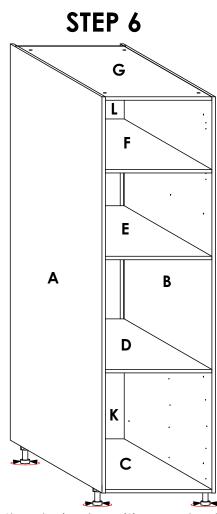

First, **check the diagonal** of the cabinet by measuring the two distances indicated by the broken lines. They should be equal. If not, twist the cabinet accordingly in the diagonal corners as shown until an equal value is achieved. After, secure panel **K** to panels **C & D** and, panel **L** to panels **F & G** as shown using **Screw 3.5 X 16mm**.

Place the four units of Leg Adjustable Base 100mm in the shown positions, aligning with the predrilled pilot holes on panel C. Ensure that the orientation is as shown in Det. 5. Using Screw 3.5 X 16mm, secure the legs onto panel C.

Flip the cabinet upright, place it in the desired position and adjust its height by rotating the base of the legs as shown to level.

See the Door Installation guide for further instructions
